Enumclaw, WA 98022

Mr. Dennis Alfredson,

I would like to thank you for all your hard work on our drainage design. We chose your company because your bid was significantly lower than all the other bids that we received. You were the only company that did not add extra items on our bid that were not necessary. One of our bids from one of your competitors included detention ponds, and pipes and vaults with an outlet flow structure (this would have been very expensive). You immediately knew that this was not necessary for our area and soil types.

Your King County Code knowledge is excellent. We were pleased with your turn around time for submitting your design to King County. We have already refereed you to our friends who will also be building in Enumclaw.

Thank you,

Sarah Hetzel
