To Whom It May Concern:

Dennis Alfredson, of Plat & Site Civil Design, has been a great team-player on several of my residential development projects. We have worked together on several short-plat projects within King and Pierce Counties, and Dennis has proven to be invaluable in the development process of these projects. He helps minimize engineering and infrastructure improvements, when possible.

Dennis has displayed extensive knowledge and skill in engineering, and produces quality drawings. He is the closest engineer I have worked with who thinks like a developer. I highly recommend Dennis Alfredson for your next project.

Sincerely,

A handwritten signature in black ink that reads "Jonathan Cooper". The signature is fluid and cursive, with the first name "Jonathan" being larger and more prominent than the last name "Cooper".

Jonathan Cooper
